

OUR SUSTAINABLE SCHOOL MODEL

Hommel Elementary School

Sustainability Series 1.1

June 2018

At Hommel Elementary School, we are excited to become a sustainable school model in Texas! Sustainability helps ensure our students continue to prosper in a healthy and sustainable learning environment. Through the Benecras Sustainability Program, we will be launching new programs and initiatives aligned to the sustainability of our campus.

The Benecras Sustainability Program is aligned to the following core components:

Facilities & Operations

Ensuring sustainable management and operations to reduce the operating costs and environmental impacts of our campus is a key priority. In doing so, this helps ensure the health and well being of our students.

Curriculum & Instruction

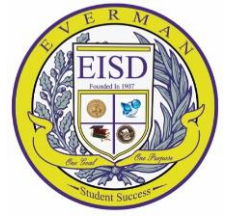

Through a campus sustainability program, our academic programs and curriculum become more rooted in sustainability literacy and project-based learning to equip students to tackle real-world challenges.

Culture & Community

We need YOU! A sustainable school has a mission and vision that is aligned, and engages community stakeholders in the sustainability of the campus and community.

For more information about the sustainability program at Hommel Elementary School or to learn how you can play a role, please complete the information form at www.benecras.com/contact.

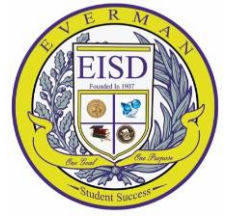

About Everman ISD

Everman Independent School District is located in the rapidly growing Dallas/Fort Worth corridor. EISD serves the city of Everman and portions of south Fort Worth, Forest Hill, and Burlison. Everman ISD provides outstanding instructional programs for prekindergarten through grade twelve. The faculty and support staff are committed to providing a quality education for all students. The schools provide innovative programs with the financial backing needed to achieve an outstanding education.

About Benecras

Benecras partners with K12 schools to improve financial and environmental performance through a managed sustainability program. By partnering with K12 schools nationally, Benecras Sustainability Programs have helped K12 schools lower their environmental impacts and operating costs by 50% in the areas of energy, water, waste, and printing. To learn more about Benecras, please visit www.benecras.com.
